

Drupal 7: How to clear Drupal and browser caches in Chrome

Step 1: While logged in as an admin user, hover over the home icon in the drupal admin menu, select 'flush all caches' from the dropdown menu

Step 2: Right click anywhere in the browser window, choose 'inspect' from the dropdown menu

Step 3: With the developer tools open (step 2), right click on the page refresh icon and select 'Empty Cache and Hard Reload'
